First Data Clover Station

The First Data Clover Station is a cloud-based POS system that helps track inventory, manage employees, build lasting customer relationships, and accept payments on one dynamic system.

Clover is designed to take all forms of payment, from credit to debit to cash and the latest payment technologies, including Apple Pay and Google Wallet.

Designed for easy setup, a contemporary feel and modest footprint Clover looks good on any counter configuration. The high-resolution touchscreen, intuitive interface and pivot arm makes it customer friendly while automatically tracking inventory and building transaction records for every sale.

Clover's web dashboard lets you remotely manage your business from any computer, smartphone or tablet. You'll enjoy full access to your business info at any time, even when you aren't in the store.

The Clover solution safeguards your customers' card data with the latest in security technology - including data tokenization and end-to-end encryption - designed for total transaction protection.

- Simple to use high-resolution touchscreen and intuitive interface
- Add or remove peripheral hardware and expand apps
- Modest footprint and removable cash drawer
- Elegant contemporary feel looks great in your setting
- PCI compliant

The Clover trademark and logo are owned by Clover Network, Inc., a First Data company. All other trademarks, service marks and trade names referenced in this material are the property of their respective owners.

- Patent-pending swivel arm
- Ethernet and WiFi enabled
- Single power source for display, thermal printer, and cash drawer
- Optional peripherals include kitchen printers, hand-held barcode scanner and integrated weight scale

Payment Card Processing Designed for Your Business

Our comprehensive service offerings enable solutions customized for your business. Better yet, our cost-plus pricing displays exactly what you are paying card issuers, card associations and Indigo. It's the same pricing method used by the largest retailers in the world.

Every client receives a written proposal detailing expected savings, and we back that proposal with our industry-leading guarantee. You will always see exactly what you are being charged. You will never experience a distorted monthly bill with tiered pricing, bill backs, or other deceptive practices. There is never a start-up fee. We will never raise our rates. And you will never pay to leave.

How It Works

Settlement Model

Understanding your business's cash receipts is vitally important. Indigo provides access to online tools to reconcile daily payments with processing activity. Now you can customize how funds and billing are paid and received to minimize the time required to reconcile payments. Whether you need fees deducted from a different account than your deposits, an ACH for each batch, or one ACH for all daily activity, we offer setup options to meet your needs.

Acceptance Devices

Offering the highest level of compatibility in the payment industry, Indigo supports almost every mobile device, terminal, gateway, Internet shopping cart and point-of-sale solution. Most of our customers do not have to change processing software or buy new equipment to experience Indigo. When the industry requires changes because of PCI, EMV, or contactless payments, Indigo provides you with all the available options.

A Core Commitment to Service

Expect incredible service from Indigo. Success is determined by your satisfaction, not short call times or one-call resolutions. We also help you keep as much of your money as possible via:

PCI Assistance

We proactively work with your business to become PCI compliant and avoid penalties.

Chargeback Support

We contact you when one of your customers initiates a chargeback, helping you to respond in a timely manner. This maximizes the probability of winning the dispute and retaining your money.

TIN Validation

Processing accounts should have tax identification numbers and business names that match IRS records. If your business does not match, we contact you to obtain the correct tax information to avoid monthly penalties and the potential of money being withheld from your daily settlement.

Indigo. Earning your business one transaction at a time.
