Payeezy Virtual Terminal

Merchants looking for a PCI compliant website, mail order, telephone order solution or want to incorporate card payment acceptance into an existing online presence, Payeezy Global Gateway e4 is for you. The hosted payment solution offers merchants customizable, secure checkout and automatic transaction results.

Grow your existing storefront business through a directed market approach utilizing Payeezy and the Internet. Robust, real-time, dynamic reporting means merchants will always know what is happening within their business whether they are physically at the location or offsite.

Payeezy accepts all traditional cards and while security is a driving force in E-commerce and mobile processing, it does not affect the online reliability or scalability. Payeezy is available 24/7 with dependable processing capabilities that speed transactions and improve the flow of funds.

The Global Gateway e4 is easily integrated using simple APIs and web based interfaces. Even novice web developers and designers can create solutions that integrate into the merchant's existing webpage. There is a wide range of compatible shopping carts allowing for easy integration.

Payment Card Processing Designed for Your Business

Our comprehensive service offerings enable solutions customized for your business. Better yet, our cost-plus pricing displays exactly what you are paying card issuers, card associations and Indigo. It's the same pricing method used by the largest retailers in the world.

Every client receives a written proposal detailing expected savings, and we back that proposal with our industry-leading guarantee. You will always see exactly what you are being charged. You will never experience a distorted monthly bill with tiered pricing, bill backs, or other deceptive practices. There is never a start-up fee. We will never raise our rates. And you will never pay to leave.

How It Works

Settlement Model

Understanding your business's cash receipts is vitally important. Indigo provides access to online tools to reconcile daily payments with processing activity. Now you can customize how funds and billing are paid and received to minimize the time required to reconcile payments. Whether you need fees deducted from a different account than your deposits, an ACH for each batch, or one ACH for all daily activity, we offer setup options to meet your needs.

Acceptance Devices

Offering the highest level of compatibility in the payment industry, Indigo supports almost every mobile device, terminal, gateway, Internet shopping cart and point-of-sale solution. Most of our customers do not have to change processing software or buy new equipment to experience Indigo. When the industry requires changes because of PCI, EMV, or contactless payments, Indigo provides you with all the available options.

A Core Commitment to Service

Expect incredible service from Indigo. Success is determined by your satisfaction, not short call times or one-call resolutions. We also help you keep as much of your money as possible via:

PCI Assistance

We proactively work with your business to become PCI compliant and avoid penalties.

Chargeback Support

We contact you when one of your customers initiates a chargeback, helping you to respond in a timely manner. This maximizes the probability of winning the dispute and retaining your money.

TIN Validation

Processing accounts should have tax identification numbers and business names that match IRS records. If your business does not match, we contact you to obtain the correct tax information to avoid monthly penalties and the potential of money being withheld from your daily settlement.

Indigo. Earning your business one transaction at a time.
